IN VITRO DIAGNOSTICS

ACCURACY YOU CAN DEPEND ON

- ✦ Blood Grouping
- ✦ Febrile Antigens
- ✦ Syphilis Serology Tests
- ✦ Latex Serology
- ✦ Consumables & Services

Griff IVD Ltd are a fully privately owned business based in Dorset in the United Kingdom. The business was established in February 2020.

We have a long and extensive professional career history in the UK IVD sector holding senior management roles within Technical Production, Operations, Quality, Regulatory, R&D and Distribution with a knowledge and experience of 40 years.

The primary focus of the business is the manufacture and distribution of IVD reagents and test kits for global markets. We provide mainly manual test kits predominantly for the emerging markets.

Specializing in latex serology, syphilis serology, microbiology, febrile antigens, and blood typing reagents.

We work with well-established suppliers with all required regulatory approvals achieved to ensure class leading products are placed on the market.

We can also offer procurement projects utilising our global supply chain.

The business is approved to ISO13485:2016 quality standard since April 2021.

As we are independent, we can offer a fast, adaptable, personal, competitive, effective and efficient service for all our IVD products and to all our partners.

Our long-term vision is to provide quality assured & reliable products to global IVD markets, with focus on the emerging markets, offering in vitro diagnostic solutions to all end users with a brand and reputation you can trust.

Our mission today is to build the strong foundations of a manufacturing base of key reagents to allow the business to develop and bringing new reagents to the IVD sector. We are working and building relationships with partners and distributors in around 30 countries as we increase the worldwide reach of Griff IVD Ltd and establish ourselves as the go to name in IVD reagent supply.

Our core values that lead our business daily include:

Putting the customer's needs at the centre of our daily thoughts, process, and operations. To challenge, value and reward our staff, suppliers, and distributors and treat all with respect.

Being environmentally aware and ensuring we are sustainably and responsibly working to protect the health of future generations for years to come.

To drive a financially sustainable business model for the mutual benefit of our network.

To commit to the demands of the IVD sector through strong and moral leadership.

Our objective is to make Griff IVD a leader in Global diagnostics at every level through diligent processes and reinvestment back into the business. We intend to partner with trusted distributors in every territory and continent worldwide, growing the business organically and sustainably.

We will diversify and develop with technological advances as the demands in social, cultural, environmental, economic, business, and political landscapes change the way we live our lives.

Griff IVD Ltd, building for the future with diagnostics you can trust.
