FURNACES

Muffle laboratory furnaces

Designed for testing of materials, heating treatment and firing of ceramic and porcelain and porcelain stoneware samples. Ideal for medical laboratories, medical institutes, colleges, art pottery and industrial laboratories

Digital timer: possibility to set temperature, speed of heating and time of keeping
Maximum temperature: 1100°C.
Microprocessor temperature controller.
Rapid heating times thanks to the low thermal mass

Turns off when the door is opened

Vacuum chamber in ceramic fibre with high thermal efficiency.
Built-in heating elements on all four sides, integrated into the fibre.
Heat-insulating materials of high quality.
Ceramic bottom plates

Dati tecnici		FM3	FM 8,2	FM 13	FM22	FM39

V/HZ 220/240 and 400-50/60

SAFETY CLASS 0

PROTECTION CLASS IP 42

ACCESSORIES

CONTROLLER
Large 5-digit display with current value and set value.
5 programs up to 8 segments
Code 720.9003.01

TIMER
Delayed furnace start
Code 720.9003.03

CHIMNEY
with fan for aging process
Code 720.9003.05

OVERHEATING SAFETY DEVICE
Furnace safety device to avoid exceeding the maximum temperature (not adjustable).
Safety class 1
Code 720.9003.02

BUZZER
Audible signal that warns the operator that the process terminated
Code 720.9003.04

HOLE
(ceramic tube) on the back
Code 720.9003.06

PC CONNECTION AND SOFTWARE
Code 720.9003.07

FURNACES

Chamber laboratory furnaces

Designed for heating treatment of materials and for the firing of ceramic, porcelain and porcelain stoneware samples. Ideal for medical laboratories, institutes, colleges, art pottery and industrial laboratories

Digital timer: possibility to set temperature, speed of heating and time of keeping
Maximum temperature 1300°C
Microprocessor temperature controller

Turns off when the door is opened

The robust ceramic chamber guarantees reliability
Control panel at the bottom of the furnace
Opened heating elements placed in the slots
Ceramic bottom plates
